Concept Summary

With more and more transportation options becoming available, people want to know the best way to get where they are going - not simply **where** to go, but **how** to go. **Go2 Navigation** uses information about your vehicle, location, and current travel conditions to bring you the most relevant and helpful information about your trip.

So, how do you get from here to there? **Go2 Navigation** can tell you:

- What is my cheapest option for travel?
- What is the most time-efficient way to travel to where I am going?
- How much will I spend on gas and auto maintenance on my trip?
- Will I have to pay for parking when I get there, and how much?
- Would it be better to drive my own vehicle, take a train or bus, or use a rideshare service like Uber?

Competitive Research

Google Maps

Easily the largest competitor, **Google Maps** is the most popular navigation app in the world. Google Maps draws from Google's extensive data banks to help users get where they want to go, showing the fastest route and multiple transportation options. Most people use Google Maps for auto navigation, and the app can also be used to show information about travel by bus, train/subway, bicycle, plane, or walking.

While Google Maps offers at least basic information about which transportation options can be used, it does not include much information about trip cost. Only basic customizability is offered, with only the ability to add a home or work location. It also does not include all available transportation methods, as there is no option to view information about taxi, rideshare, and ferry services.

Competitive Research

Waze

Waze is a popular navigation app that utilizes users' data to provide the most up-to-date information about traffic conditions, including wrecks and police speed traps. Waze is very community-centered, allowing users to connect with their friends and keep track of where they are. It is a separate application from Google Maps, however Waze was acquired by Google in 2013, and Google Maps has incorporated several of Waze's community-driven features.

Waze users can get bogged down with either lots of irrelevant data in an area where there are many users, or too little information in areas with few users - the number one complaint about the app is how unclean the interface is, with the number of icons that appear on screen. The Waze app is also reportedly a drain on a device's battery, as it is constantly sending GPS and other data from the device back to Waze, even when the app is not in use.

Competitive Research

Apple Maps

Apple Maps is Apple's native navigation app for iOS and Mac OS devices. The main advantage of Apple Maps is its integration with other Apple products, like Siri and Apple Watch. Some also prefer the interface of Apple Maps to that of Google Maps, as well as the amount of personal data shared, which is significantly less with Apple's app versus Google's.

Business and Customer Analysis

Business Analysis	Customer Analysis
<p>Includes professionals from various industries in the public and private transportation sectors - people who contribute to the ongoing conversations of how smart transportation options work in modern times.</p>	<p>Customers would include anyone with a need for more information about their transportation options, especially those in cities and areas that offer multiple and new ways of travel.</p>

Pain Point Mind Map

Business Problem Classification Table

Business Problems	User Problems
IT - Developers, QA, Support, etc.	Navigation and data errors
Which business model to use	Issues with use of app interface
Gathering data from public trans. agencies	Reluctance to share personal data
Amount of company and user data to store	Possibly irrelevant data displayed to user
Need to have the most current data	
Competition from similar apps/websites	

Personas

Ryan Ross

Narrative:

Ryan is a single, young professional living in Newark, New Jersey. He works in the Financial District in Manhattan and commutes to work every day Monday through Friday.

Scenario:

Ryan lives in Newark and has a work commute into Manhattan and has to get there somehow. Currently, he drives his car and his main concerns are the traffic and the large toll that he has to pay to cross into New York.

Needs:

Ryan would like to know what the best transportation option is for commuting to work each day. Since driving his car involves dealing with heavy traffic and paying a toll, he would like to see what his other options are.

User stories:

- ◆ As a user and daily commuter, I would like an app that shows the total cost of a daily commute.
- ◆ As a user, I would like information on comparing different transit options.
- ◆ As a user, I would like information about traffic.
- ◆ As a user, I need to know how long my trip would take with each of my transit options.
- ◆ As a user, I would like an app that has reliable data about commuting times and cost.

Personas

Chelsey Rollins

Narrative:

Chelsey lives in Miami, is married with 2 kids, and loves to travel. She wants to spend some vacation time with her family, and recently decided that they would go to France. Now she wants to do more planning for the trip.

Scenario:

Chelsey is going on a vacation in France with her husband and kids, and would like to know the best way to get around while they are there. She doesn't know whether she will take a train or rent a car once they get there.

Needs:

Chelsey knows that she certainly has Paris and the French Riviera on her itinerary. She may get ideas for more stops before she leaves or during their trip. She would like to know beforehand what method of travel to take, and might need to improvise.

User stories:

- ◆ As a user and frequent traveller, I would like an app that shows me how I can travel in a foreign country.
- ◆ As a user, I would like the flexibility to add destinations as my trip progresses.
- ◆ As a user, I need information about flights and at least one other method of travel.
- ◆ As a user, I need to know how to travel to and from an airport.
- ◆ As a user, I need relevant information for my entire family on this trip.

Personas

Wallace Blundell

Narrative:

Wallace is a 60-year-old man living in Dallas. The rest of his family lives in Kansas City and he has visited them many times. Because of his financial situation, he wants to save as much money as possible while travelling.

Scenario:

Wallace is planning a trip from Dallas to Kansas City to see his family, and would like to know if it would be better to drive or to fly. He is comparing the convenience and short travel time on a flight vs. the cost of travelling by car.

Needs:

Wallace needs a simpler website interface so that he can easily understand which method of travel is the best. Wallace does not understand how to use computers or websites quite as well as younger people, so he will need an interface that is simple.

User stories:

- ◆ As a user and a generally technology-illiterate person, I need an application or website with a simple interface.
- ◆ As a user, I need information on different methods of travel.
- ◆ As a user, I need information about my specific destinations.
- ◆ As a user, I would like only the information that is relevant to me, and nothing extra.
- ◆ As a user, I need accurate information.

Personas

Terence Graves

Narrative:

Terence lives and works in Greenville, South Carolina. He relies on his car to get around. He has read some online articles about public transit and is interested to know about his other travel options.

Scenario:

Terence drives a lot and would like to see if there is an alternative to having to drive through rush hour traffic all the time. He works at a location 20 miles from his home..

Needs:

Terence needs to see whether there are any other transportation options available to him besides driving his own car. He also needs information on alternate routes he could be taking while driving, since traffic is his main problem.

User stories:

- ◆ As a user and motorist, I need information about driving routes in my city.
- ◆ As a user, I need to know about alternate transit options in my city.
- ◆ As a user, I need to know about travel information to my most frequently-visited locations.
- ◆ As a user, I would like to see traffic information.
- ◆ As a user, I would like to know in general about the most effective transportation in my city.

Personas

Lena Brewer

Narrative:

Lena lives in Columbus, Ohio and has children. She has been driving a sedan, but needs a larger vehicle to accommodate her family's size.

Scenario:

Lena is about to purchase a new vehicle. Since she drives a lot, one of the major factors that will decide which vehicle she will buy is the gas mileage.

Needs:

Lena wants to use Go2 Navigation to compare the cost of her daily trips from home to work, her kids' school, and other places she commonly visits. She wants to compare different vehicles to see what a significant cost difference there would be for each trip.

User stories:

- ◆ As a user and as I am shopping for vehicles, I would like information about vehicles' gas mileage.
- ◆ As a user, I would like to know how much my daily trips would cost.
- ◆ As a user, I need to compare the cost of my trips using different vehicles.
- ◆ As a user, I need information on the average cost of gas in my city.
- ◆ As a user, I need basic navigation features in an app.

User Stories Table

User Story #	Ryan Ross	Chelsey Rollins	Wallace Blundell	Terence Graves	Lena Brewer
1	As a user and daily commuter, I need an app that shows the total cost of a daily commute.	As a user and frequent traveller, I would like an app that shows me how I can travel in a foreign country. Summary of Strengths and Weaknesses

Strengths	Weaknesses
All respondents found it easy to find information on the site, as well as information relative to the user.	There was one suggestion to add a "contact us" button to the nav bar as a way to improve the navigation.
All respondents found it easy to navigate around the site.	For what type of information could be added to make the site more beneficial, one user suggested adding somewhere to bookmark or favorite a route that you take regularly. Another user suggested adding points of interest to the nav.
Two respondents thought that the information prompts on the Navigation page were helpful.	For what features are missing or would be useful to add, one user suggested having a "Use Current Location" button beside the "From" input on the Navigation screen.
All respondents rated the visual aspects and aesthetics of the site highly, and one user had an additional positive comment about the colors.	One user thought that having "plane" and "train" options on the Navigation page is superfluous.
For the most enjoyable part of the site, one respondent liked the path from navigation to options to the map; another liked the lists of fastest and slowest routes, and another liked the transit options.	One user was unsure of what news would appear on the News page.

Revisions Based on User Feedback

Site Category	User Feedback	Planned Revisions
Finding information / site navigation	<p>All respondents found it easy to find information on the site, as well as information relative to the user.</p> <p>All respondents found it easy to navigate around the site.</p> <p>There was one suggestion to add a "contact us" button to the nav bar as a way to improve the navigation.</p>	<p>User flow and site navigation seem to be working well based on feedback.</p> <p>Adding a "Contact Us" link will make navigation links more relevant.</p>
Navigation in progress page	<p>For what type of information could be added to make the site more beneficial, one user suggested adding somewhere to bookmark or favorite a route that you take regularly.</p> <p>Another user suggested adding points of interest to the nav.</p>	<p>The option to bookmark a route will be made available in the "Navigation in progress" page for the user's current route.</p> <p>Points of interest would be part of the actual functionality of this page which is not built yet (there's just a placeholder there at the moment), but it is a good suggestion.</p>

Revisions Based on User Feedback

Site Category	User Feedback	Planned Revisions
Navigation prompt page	<p>Two respondents thought that the information prompts on the Navigation page were helpful and not obtrusive.</p> <p>One user thought that having "plane" and "train" options on the Navigation page is superfluous; however, another user liked the transit options.</p> <p>One user suggested having a "Use Current Location" button beside the "From" input on the Navigation screen.</p>	<p>The main functionality of the Navigation prompt page seems to work well based on respondent opinions.</p> <p>One of the original intentions was to include the cost of airfare and train fare versus other methods of transportation; as Go2 Navigation is an app designed for providing information on transit options, the "plane" and "train" selections will stay.</p> <p>A "Use Current Location" button to use as the "from" location is a great idea - will add a button for this.</p>
Visual / aesthetics	<p>All respondents rated the visual aspects and aesthetics of the site highly, and one user had an additional positive comment about the colors.</p>	<p>No revisions necessary.</p>

Revisions Based on User Feedback

Site Category	User Feedback	Planned Revisions
User flow and site functionality	For the most enjoyable part of the site, one respondent liked the path from navigation to options to the map; another liked the lists of fastest and slowest routes.	Confirmed that the functionality of a major part of the site user flow (Navigation prompt -> Navigation options -> Navigation in progress) works well.
News page	One user was unsure of what news would appear on the News page.	Since the "Contact Us" page is more important, that link will replace the one for "News" in the top navigation bar. The News page will remain accessible via the link in the bottom-right corner of the Home page.

GitHub repo commit history

The screenshot shows a GitHub repository page for 'ADVsummer / CapstoneProjectB'. The top navigation bar includes links for 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. The repository name is 'ADVsummer / CapstoneProjectB'. Below the repository name, there are buttons for 'Unwatch' (1), 'Star' (0), 'Fork' (0), and a bell icon. The main navigation tabs are 'Code' (selected), 'Issues' (0), 'Pull requests' (0), 'Actions', 'Projects' (0), 'Wiki', 'Security', 'Insights', and 'Settings'. A dropdown menu for the 'Branch: master' is shown. A section titled 'Commits on Feb 17, 2020' displays a single commit by 'ADVsummer' committed 1 minute ago. The commit message is 'Add files via upload'. Below the commit, there are buttons for 'Verified', a file icon, the commit hash 'b518d96', and a copy icon. Navigation buttons for 'Newer' and 'Older' are also present. At the bottom of the page, there are links for 'Contact GitHub', 'Pricing', 'API', 'Training', 'Blog', and 'About', along with the GitHub logo.

Change documentation

- ❑ Mobile versions of the **home page** and **account page** have been designed.
- ❑ On the initial sketch, the mobile version of the **home page** did not have a **large image**, a "**Welcome!**" **message**, or the **transportation icons**. However, I feel that this did not provide enough content above the fold, so they were **added back to the design** without feeling too cluttered.
- ❑ When the mobile version of the **home page** is scrolled down, the modules toward the bottom of the page (**About what we do**" and "**More features**") include a header, text, and button, but **not** the image from the desktop version.
- ❑ Based on some feedback, the **desktop version of the account page** has been redesigned. The **gradient transition** from the left sidebar to the background fill color has been removed and **replaced with a clean break** between the sidebar and page background. Because of this change, a **more neutral gray color** and **black text color** were chosen for the sidebar.
- ❑ The position and size of the **input fields** on the **desktop version of the account page** have also been rearranged. Smaller text labels are present.
- ❑ The changes to the **desktop version of the account page** have also been incorporated into the **mobile version of the account page**.

Change documentation

- ❑ The **home page** has been completely coded in a **responsive design** using Bootstrap.
- ❑ Using custom **mobileOnly** and **desktopOnly** classes along with **media queries**, some elements display only on the mobile version or desktop version of the site.
- ❑ Some **elements that exist in all versions** of the site have **spacing, positioning, and/or content** that is specific to **one version**. These changes are implemented using the method described above, as separately-defined elements that are activated **when a mobile or desktop device is detected**.
- ❑ Responding to a suggestion that was made, the **background color** of the page has been changed from light gray-blue with a subtle gradient effect on the sides to a **solid, very light gray** (nearly white) color.
- ❑ The **nav bar** in the original design had a **Contact Us** link added. However, the contact form is in the **About** page so there is no need for a separate Contact Us page. This link in the nav bar has been removed.

Windows Start button, Taskbar icons (File Explorer, Edge, OneDrive, Calendar, Chrome, Paint, Mail, Photos, File History, Task View, Microsoft Store, Power User), Network icon, Volume icon, Battery icon, Language icon (ENG), Date and time (11:45 PM 3/2/2020)

Home page – desktop – scrolled down

The screenshot shows the home page of the Go2 Navigation website as it would appear on an iPad. At the top, there is a navigation bar with links for Home, Navigation, Locations, About, and My Account. Below the bar is a large, colorful collage of travel-related images, including the Statue of Liberty, the Eiffel Tower, St. Basil's Cathedral, and various modes of transportation like cars, buses, and planes. A prominent green button in the center of the collage says "Welcome!". Below the collage, the text "Simple navigation...and so much more!" is displayed. A descriptive paragraph explains that the service provides more than just directions; it uses vehicle information and travel conditions to offer relevant trip details. Below this text are icons for bus, car, train, and plane, followed by a "Get Started Now" button. To the left is a large green arrow pointing right, and to the right is a magnifying glass over a map.

GitHub repo commit history

Change documentation

- ❑ The **Navigation**, **Locations**, and **About** pages have been coded for multiple device sizes.
- ❑ The **Home** page has a small modification where the **text above the icons** displays on part of the page width, not the full width.
- ❑ Some pages use **CSS styling** to reposition and appropriately render elements on the page on different screen widths.
- ❑ Other pages use **media queries** to display some elements only on a certain device viewport size range.
- ❑ Following are **screen captures** of each page for **desktop**, **tablet**, and **mobile**.

GO2 NAVIGATION

Home Navigation Locations About My Account

Our Vision

At Go2 Navigation, we seek to create an environment where it is as easy as possible for travelers to get from point A to point B, while providing the most relevant information. We want people to be aware of all their options, including possible traffic, costs, and time constraints so that they can plan their most effective trip.

How to Use Go2 Navigation

Go2 Navigation is a simple and easy-to-use tool for travelers to see what all their options are for getting from one place to another, using any mode of transportation. Simply follow the links to the **Navigation** area, enter your from and to locations, and Go2 Navigation will calculate the most effective travel options between these locations.

The screenshot shows a mobile website for "GO2 NAVIGATION". The header is teal with white text. It includes a logo with "GO2" and "NAVIGATION" stacked, and navigation links for Home, Navigation, Locations, About, and My Account. Below the header are three main content boxes with orange headers and light blue backgrounds. The first box is titled "Our Vision" and contains a paragraph about creating an environment where it's easy for travelers to get from point A to point B. The second box is titled "How to Use Go2 Navigation" and describes the tool as simple and easy to use for travelers to see all their options. The third box is titled "Contact Form" and asks users for help or suggestions, providing a form with fields for Name, Email Address, and Message, along with a "Submit" button.
